Auditor Evidence and Remediation Matrix

NIST Pillar	Control Category	Current Status	Maturity Score	Audit Question	Action To be Taken
DETECT	Security Monitoring	Antivirus software is installed on laptops, but alerts are sent locally to individual users rather than a central dashboard.	2	Is there an antivirus software or monitoring system installed on all devices to flag malicious activity?	Centralize antivirus logging to a unified cloud console monitored weekly by IT.
IDENTIFY	Asset Management (SW)	App developers use GitHub, but third-party cloud tools and software licenses are untracked across operations.	2	Is there an official registry of all software applications, cloud services, and API keys used?	Conduct a software audit to catalog all active SaaS subscriptions and code repositories.
IDENTIFY	Asset Management	Laptops are bought as needed.	1	Does the company maintain an up-to-date	Build a centralized hardware asset
